College Butler

Website prototype for the first concierge service designed exclusively for college students.

Welcome to Affinity Networks...

High performance, secure and reliable IP-based applications and networks are essential to companies that realize the value of being on-line. Affinity Networks is an Intranet/Internet services and integration firm involved in the development, deployment and operation of electronic communities, e-commerce

applications, electronic transaction systems and wireless applications for commercial and Government entities. These products and services are constructed using commercially advanced technologies operating upon high performance, secure, cost effective and reliable networks.

Company Overview

As the Internet continues on its evolutionary cycle, it is the intent of Affinity Networks to be one of the leading players in the provision of IP-network services. Affinity Networks will accomplish this by providing services that are specifically designed to meet the needs of targeted industries during the phase of Internet development. Affinity Networks will develop and support products which will:

Provide a high technology communications infrastructure, which will support the level of network performance required from each specific target user group. Provide access to information and resources relevant to a particular constituency of users, and provide that same group with the tools necessary to generate and manage their own relevant content.

Provide e-commerce solutions that in addition to serving the role of traditional purchasing portals, improve the purchase with information in an organized fashion to support informed purchase decisions. Leverage the Intranet/Internet user base and the network as a high technology delivery channel to deliver targeted content to specific user groups.

Affinity Networks has as its vision the bridging of user requirements with the appropriate innovative technologies. By applying a thorough understanding of the underlying technologies with specific industry knowledge Affinity Networks will provide appropriate solutions to the targeted industries. These solutions will include Internet/Intranet based applications and a solid network infrastructure on which to deploy them.
